

FREE hot water from the sun

What is the SOLiC 200?

The award-winning SOLiC 200 automatically converts energy generated by your existing PV panels into hot water by diverting excess solar power to the immersion heater before it's exported to the electricity grid. Simple to use and maintenance free, the SOLiC 200 is self contained, easy to install and can save you hundreds of dollars over the course of a year. The SOLiC 200 comes with a 10 year return to base UK warranty & 2 year Australian.

It has been designed, constructed and tested in Britain to CE, IEC and Australian Standards. The unit can be installed quickly and easily by a qualified electrician without the need for plumbing alterations.

Key features

- Provides free hot water from PV panels
- Saves hundreds of dollars on energy bills
- Returns on investment in less than 3 years
- Includes 10 year UK and 2 year Australian back to base warranty
- Operates with zero threshold export to the grid
